QUICK START GUIDE FOR STAFF

Welcome to Atlas

Atlas is where you'll find your rota, book holiday, do your checks, see your tasks and training, and keep up with company news – all on your phone.

1 Sign in for the first time

1. **Look for your invite email**
   It's from Atlas and has a link to choose your password. Check your junk folder if you can't see it.
2. **Tap "Choose your password"**
   Pick a password of at least 8 characters. The link works for 14 days – if it's run out, ask your manager to send a new one.
3. **You're in**
   Next time, sign in with your email address and that password.
4. **Make it an app**
   Add Atlas to your phone's home screen so it's always one tap away – see page 2. It takes 30 seconds.

The sign-in screen

> Forgotten your password? Tap **Forgot password?** on the sign-in screen and we'll email you a link to choose a new one.

Your Atlas web address

Open this in your phone's web browser (Safari on iPhone, Chrome on Android):

_____

It's also the link in your invite email.

At a glance

Once you're signed in, the bar along the bottom of the screen takes you everywhere:

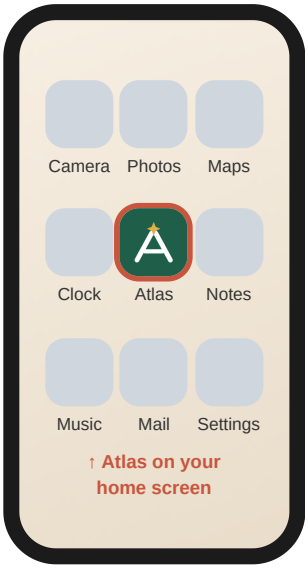

- 📅 **Rota** – your shifts and the team's
- ☑ **Checks** – today's compliance checks
- 👤 **My Atlas** – your home page
- ☰ **Menu** – everything else

2 Make Atlas an app on your phone

Atlas doesn't come from the App Store or Google Play. You add it straight from the website, and it then works like any other app: its own icon, opens full screen, and keeps itself up to date.

iPhone or iPad

1. **Open Atlas in Safari**
   It must be Safari – other browsers on iPhone can't add it properly.
2. **Tap the Share button**
   The square with an arrow pointing up – at the bottom of the screen (or the top on an iPad).
3. **Scroll down and tap "Add to Home Screen"**
   Can't see it? Tap **Edit Actions…** at the bottom of the list.
4. **Tap "Add"**
   The Atlas icon appears on your home screen. From now on, open Atlas from that icon.

↑ Atlas on your home screen

Android phone

1. **Open Atlas in Chrome**
2. **Tap "Install app"**
   If Chrome doesn't offer it, tap the ⋮ menu (top right) → **Install app** or **Add to Home screen**.
3. **Tap "Install"**
   Atlas appears with your other apps.

Computer (optional)

1. **Open Atlas in Chrome or Edge**
2. **Click the install icon**
   At the right-hand end of the address bar (a screen with a down arrow).
3. **Click "Install"**
   Atlas opens in its own window from your apps.

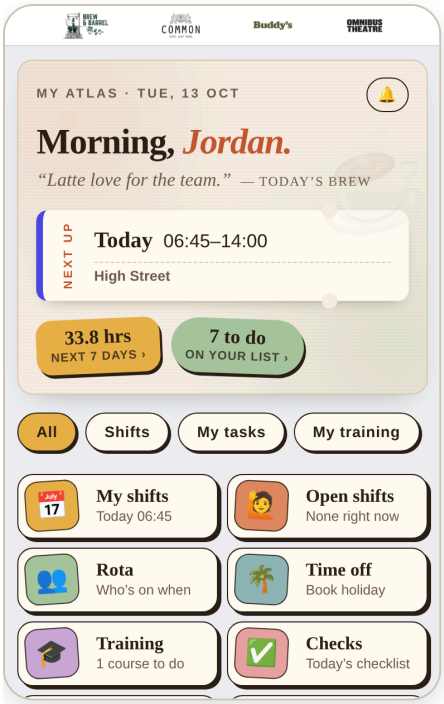

3 Turn on notifications

Get a notification when the rota is published, your shift changes, your holiday is approved, there's an open shift, news or new training.

1. **Open Atlas from its icon**
   On an iPhone, notifications only work once Atlas is on your home screen and opened from there.
2. **Go to My Atlas → Phone notifications**
   Tap **Turn on notifications on this phone**, then **Allow** when your phone asks.
3. **Choose what you get**
   Untick anything you don't want, and tap **Send a test** to check it works.

> Said "Don't allow" by mistake? Turn them on in your phone's **Settings** → **Notifications** → **Atlas**, then come back to My Atlas.

4 Your home page: My Atlas

My Atlas opens when you sign in. At the top you'll see:

- **Next up** – your next shift, when and where.
- **Hours** – how many hours you're on for the next 7 days.
- **To do** – everything waiting for you: tasks, checklists, training and news to read.

Below that are shortcuts to your shifts, open shifts, the rota, time off, training, checks, wastage and documents – then **My tasks**, **Your week** and the company **Newsfeed**.

> When there's an important update in the newsfeed, tap **Confirm you've read it** so your manager knows you've seen it.

5 Your shifts

Tap **Rota** at the bottom, or **My shifts** on My Atlas. You'll see each day you're working, your start and finish times, your break and who you're on with.

Use **Whole rota** to see the whole team, and **‹ Prev** **Next ›** to look at other weeks.

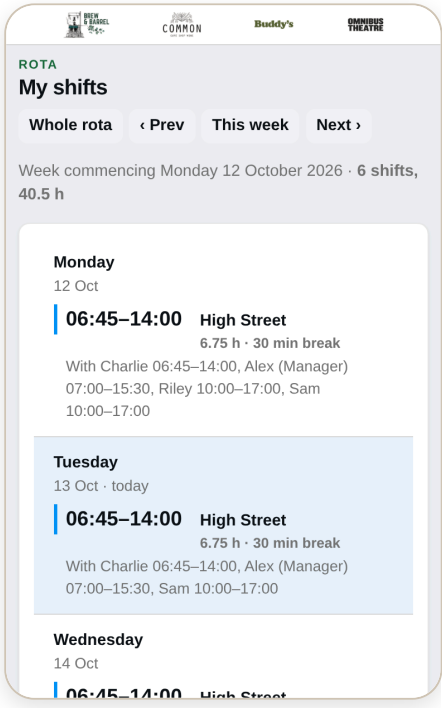

You only see the rota once your manager has published it – you'll get a notification when they do.

Can't make a shift?

Tap **Drop shift** under it, add a reason if you like, and tap **Ask to drop**. Your manager approves it first – **until then it's still your shift**. Once approved, anyone can pick it up.

Want extra hours?

Open shifts on My Atlas lists shifts nobody's doing yet. Tap one to ask to pick it up.

My shifts

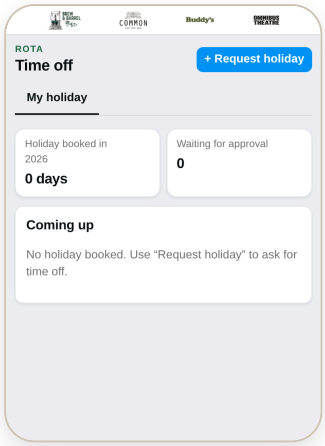

6 Holiday and availability

Booking holiday

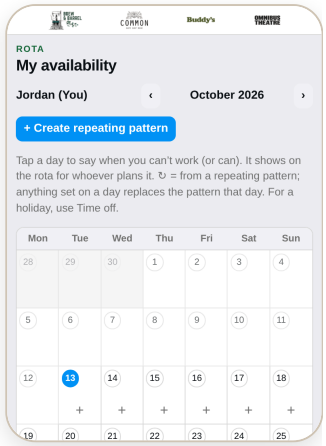

Menu → **Time off** → **+ Request holiday**. Pick your dates and send it. You'll get a notification when it's approved or declined, and approved holiday shows on the rota.

When you can't work

Menu → **My availability**. Tap a day to say when you can't (or can) work, or tap **+ Create repeating pattern** for things like college every Tuesday. Whoever plans the rota sees it.

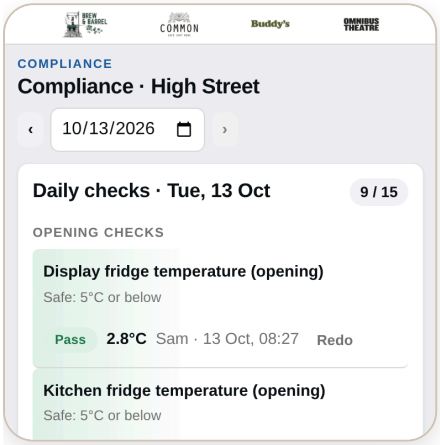

Time off

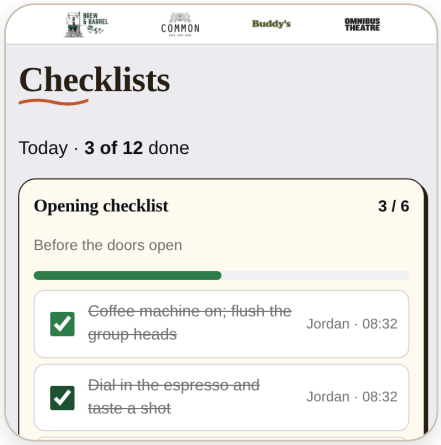

My availability

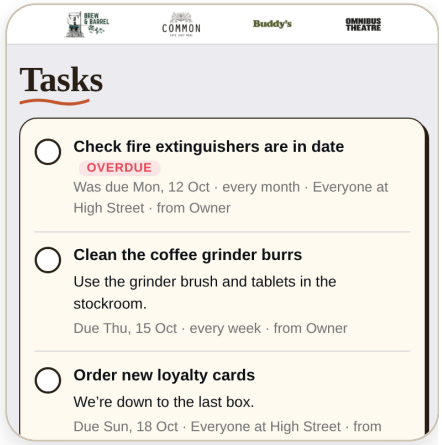

7 Checks, checklists and tasks

Checks

Checklists

Tasks

- **Checks** (bottom bar) are the food-safety checks for your site: fridge and freezer temperatures, cleaning, allergens and so on. Type the reading and tap **Record**, or tap **Pass**. If something fails, Atlas asks what you did about it.
- **Checklists** (Menu → Checklists & Tasks) are your opening, closing and cleaning lists. Tick each thing off as you do it – your name and the time are saved.
- **Tasks** are jobs your manager has given you or your team. Tap the circle when it's done.

8 Training

When you're given a course, it shows on My Atlas with its due date. Tap **Start**, read each page (some have videos) and answer the questions at the end. If you don't pass first time, have another go. Find all your courses under **Training** on My Atlas.

? Quick answers

I didn’t get an invite email.
Check your junk or spam folder. Still nothing? Ask your manager to check your email address in Atlas and send the invite again.

The invite link says it’s run out.
Links last 14 days. Ask your manager for a new one, or tap **Forgot password?** on the sign-in screen.

I can’t see next week’s rota.
It hasn’t been published yet. You’ll get a notification as soon as it is (if notifications are on).

My shift looks wrong.
Speak to your manager – they can change it. If you can’t do it, use **Drop shift** so it can be covered.

There’s no “Add to Home Screen” on my iPhone.
Make sure you’re in **Safari**, not Chrome or another app (for example a link opened inside your email app). Copy the address into Safari and try again.

I’m not getting notifications.
Open Atlas from its home-screen icon, go to My Atlas → Phone notifications and tap **Send a test**. If nothing arrives, check your phone’s Settings → Notifications → Atlas is allowed, and that Focus or Do Not Disturb isn’t on.

Does Atlas use my mobile data or need updating?
It needs an internet connection, and uses very little data. It updates itself – there’s nothing to download.

Can I change my password?
Yes: tap your name in the menu → **Your account** → **Change password**.

Your checklist for today

- [ ] Signed in and chosen a password
- [ ] Added Atlas to my home screen
- [ ] Turned on notifications
- [ ] Found my next shift
